

1.75	l	Trail to outhouse (toilet)			
1.82	l	Trail to his and her outhouses			
1.82	r	Nice long log for a rest stop			
1.84	r 40	changeable phacelia	<i>Phacelia mutabilis</i>	10 / 3	11
1.84		Jct. trails to Wellman Divide (l) and Tamarack Valley (r); go left; elevation 9040 feet (2755 m). Sign: "[left] Wellman Divide 1 mi; San Jacinto Peak 3.3 mi; Saddle Junction 4.3 mi; Humber Park 6.8 mi; [right] Tamarack Valley 0.5 mi; [back] Long Valley 2.0 mi; Willow Creek 4.0 mi; Saddle Junction 5.5 mi"			
1.84	r	Tapped spring with available water			
2.02	r 41	forest goosefoot	<i>Chenopodium atrovirens</i>	10 / 1	7
2.03	b 42	limber pine	<i>Pinus flexilis</i>	20 / 9	11
2.77		Wellman Divide; elevation ~9720 feet (2963 m); Sign: "[right] San Jacinto Peak 2.3 mi; [back] Round Valley 1.0 mi; Long Valley 3.0 mi"			

Mile: 0.00 includes all mileages from 0.000 to 0.009; etc.

Side: Side of trail on which the first occurrence is found: left, right, both, or center

#: On-Trail species are numbered in order of first occurrence on trail (touchable without leaving the trail). Off-trail species are in parentheses.

id?: Species without an entry in this column are positively identified. "?" means we are just guessing the identification; "sp" means the genera is probably known, but the species name is uncertain; "~" means we have 95% confidence that this is the determination, but have not yet positively identified it; "ssp" means the subspecies or variety needs to be determined.

#here gives the *minimum* number of on-trail plants of this species on this trail, with the number of locations on this trail following the /, using maximum values of 99/9. 1/1 means a single plant in a single location; 10/9 means 10 plants occurring in at least 9 locations, etc.

#all gives the number of plant trail guides, from all over southern California, that contain this taxon.
